DETAILED ACTION

The following action is in response to communications filed for application 10/766,805 on June 2, 2006.

Drawings

The drawings were received on June 2, 2006 and September 8, 2005. These drawings are approved.

Allowable Subject Matter

Claims 15-27 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or render obvious the apparatus for or the method of driving an aircraft with two propeller engines, and particularly including two pump driving shafts that rotate in opposite rotational directions, respectively, the pumps being driven in the same rotational direction via respective gear sets, and including the remaining structures of claims 15 and 22, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Upon further consideration, it has been determined that applicant did disclose the multi-engine configuration, as this was the problem being solved. Applicant previously only discussed the various configurations for one engine/pump arrangement, but the arrangements were applicable to each of the multi-engine assemblies. Therefore, the previous 35 USC 112 first paragraph rejections have been rescinded.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Copeland and Petrowicz have been cited to show similar propeller/transmission arrangements.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roger L. Pang whose telephone number is 571-272-7096. The examiner can normally be reached on 5:30am to 4:00pm.
